How to Recover Access to Coinbase Wallet? {Get Instant Help}

Recovering access+1-888-394-2349 [USA/OTA] to Coinbase Wallet depends on whether you still have your wallet recovery phrase or access to+1-888-394-2349 [USA/OTA] the device +1-888-394-2349 [USA/OTA]where your wallet was created. Coinbase Wallet is a self-custody wallet, which means you control+1-888-394-2349 [USA/OTA] your private keys and recovery phrase.+1-888-394-2349 [USA/OTA] If you have your 12-word recovery phrase, you can restore access by installing the+1-888-394-2349 [USA/OTA] Coinbase Wallet app or browser extension+1-888-394-2349 [USA/OTA] on your device, selecting the option to import or restore an existing wallet, and entering your+1-888-394-2349 [USA/OTA] recovery phrase correctly.+1-888-394-2349 [USA/OTA] After the wallet is restored, you can create a new password, +1-888-394-2349 [USA/OTA] enable biometric security, and continue managing your digital assets.

If you+1-888-394-2349 [USA/OTA] lost access to your device but still have your recovery phrase, you can recover your wallet on a new device+1-888-394-2349 [USA/OTA]. However, if you lose your recovery phrase,+1-888-394-2349 [USA/OTA] Coinbase generally cannot recover your+1-888-394-2349 [USA/OTA] wallet because it does not store or have access to your private keys. Common reasons users lose access+1-888-394-2349 [USA/OTA] include forgetting their wallet password,+1-888-394-2349 [USA/OTA] changing phones, deleting the app,+1-888-394-2349 [USA/OTA] or losing access to the browser extension. Before attempting recovery, make sure you are using+1-888-394-2349 [USA/OTA] the official Coinbase Wallet application+1-888-394-2349 [USA/OTA] or extension and never share your recovery phrase with anyone+1-888-394-2349 [USA/OTA]. Anyone who has your recovery phrase can control your wallet and access your funds.
